Human athletes know the importance of a focused rehabilitation program after an injury or surgery. Getting back to peak physical condition is their number one goal. Here at *Circle City* we offer the same level of medicine to our animal patients. Getting them back to peak physical condition is *our* number one goal.

Circle City Veterinary Specialty & Emergency Hospital is a full service rehabilitation center for animals. We combine proven therapies, a variety of modalities and home exercises to return pets to the active life styles that they share with their owners.

- Underwater treadmill
- Therapeutic exercises
- Stretching/ Range of Motion
- Massage Therapy
- Heat & Cryotherapy
- Strength Conditioning packages

These services are used to treat many different types of conditions such as: rehabilitation of orthopedic or neurology surgery patients, arthritis pain, degenerative joint disease, tendon or ligament injuries, muscle spasms, weight control, pain management, and much more.

A diagnostic and treatment regimen will be outlined and instituted after discussing the course of action that best suits each patient's needs. We will present you with options, potential outcomes and realistic goals. You will decide what best fits your needs and desires. **Visit our website, www.circlecityvets.com for more information.**
